Bhopal, Madhya Pradesh, India | +91 7067991838 | himanshutripathi1838@gmail.com | [linkedin.com/in/himanshu-tripathi-454343259](https://www.linkedin.com/in/himanshu-tripathi-454343259) | github.com/himanshutripathi1838

PROFESSIONAL SUMMARY

Computer Science Engineering graduate (B.Tech, 2026) with hands-on experience in full-stack development (MERN stack) and applied AI/ML for computer vision. Shipped two production-grade applications using Node.js, Express.js, React.js, and MongoDB, and built a YOLOv8-based object detection system achieving ~90% accuracy. Skilled in RESTful API design, database architecture, authentication/access control, and Agile collaboration within cross-functional teams. Seeking a Software Engineer / Backend Developer role at a product-based company.

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, C++, C
- **Frontend Development:** React.js, HTML5, CSS3, Tailwind CSS, Bootstrap
- **Backend Development:** Node.js, Express.js, RESTful API Design
- **Databases:** MongoDB, MySQL
- **AI / Machine Learning:** Python, OpenCV, YOLOv8, Object Detection, Data Augmentation
- **Tools & Platforms:** Git, GitHub, Postman, VS Code
- **Core Concepts:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), DBMS, MERN Stack, Agile Collaboration

PROFESSIONAL EXPERIENCE

AI/ML Intern | Prudent Systems Pvt. Ltd.

May 2026 – Present

Railway Pole Detection System | Python, YOLOv8, OpenCV

- Engineered and trained a YOLOv8-based object detection model to identify railway poles from real-world imagery, achieving approximately 90% detection accuracy.
- Annotated and preprocessed a dataset of 500+ images and applied data augmentation techniques, improving model generalization by 15% and cutting the false-positive rate by 20%.
- Collaborated with a cross-functional engineering team to integrate the detection pipeline into existing workflows, presenting model performance in regular team reviews.

PROJECTS

Shiftlyin — Smart Part-Time Job Marketplace Platform | Personal Project

React.js, TypeScript, Vite, Tailwind CSS, Node.js, Express.js, Firebase, Cloudinary

- Developed a full-stack job marketplace connecting verified students (18+) with verified local businesses for part-time jobs, internships, and gig opportunities.
- Built secure role-based dashboards for Students, Businesses, and Admin with real-time job/application tracking, in-app chat, GPS-based attendance, and wallet management.
- Implemented identity verification, ratings & reviews, and a reputation-scoring system on a scalable, responsive architecture deployed via Vercel.

Healthcare Consultation Platform | Personal Project

React.js, Node.js, Express.js, MongoDB | care-connect-ten-alpha.vercel.app

- Architected and built a full-stack doctor-booking platform with 10+ RESTful APIs covering scheduling, authentication, and consultation tracking.
- Implemented JWT-based authentication and role-based access control (RBAC) for patients and doctors, supporting 100+ concurrent users.
- Independently led end-to-end development from database schema design through deployment, optimizing the React.js UI (lazy loading) to cut page load time by 30%.

Online Food Delivery System | Personal Project

HTML, CSS, JavaScript, MySQL | github.com/himanshutripathi1838/Online_food

- Built a multi-role food ordering platform (customer, restaurant, admin) with real-time order tracking, integrated payment processing, and Google Maps API-based restaurant discovery.
- Designed a normalized MySQL schema spanning 10+ relational tables and implemented secure, session-based authentication across all three user roles.

EDUCATION

B.Tech in Computer Science Engineering | Sagar Institute of Science & Technology, Bhopal

2022 – 2026

- CGPA: 7.53 / 10

Class XII (Senior Secondary): 75.2% (2022) | **Class X (Secondary):** 81.25% (2020)

CERTIFICATIONS & ACHIEVEMENTS

- Oracle Cloud Infrastructure (OCI) Foundations Associate Certification
- Python Essentials 1 — Cisco Networking Academy
- Coding Development Certification
- Ranked in the Top 10% at a national-level hackathon (working prototype delivered in 24 hours); National semifinalist in a competitive online gaming event with 500+ participants.
